

Schedule of Proposed Additional Modifications to the Places for Everyone Plan

Additional modifications (sometimes also referred to as “minor modifications”) are changes which do not materially affect the policies in the Plan. They do not fall within the scope of the examination however the nine PfE districts consider that it would be helpful to identify these alongside the Main Modifications’ Schedule for completeness. The additional modifications are clearly set out with deletions being shown as strikethrough and new text being underlined.

This growth, in turn, will contribute to a significant increase in households. 66 9% of the population growth is expected to be in those aged 65 and over, and approximately 40% of the growth will be amongst those aged 75 and over. Growth in the working age population (18-64) will be lower (approximately 40 38% of the total growth), but still significant at around 75,000. Similar changes in the sectoral mix to the recent past are forecast, although a more ambitious accelerated growth scenario estimates an increase of just over 170,000 jobs across Greater Manchester. Employment opportunities are unevenly dispersed across Greater Manchester, with by far the most significant concentration currently being in the City Centre and adjoining areas such as Salford Quays, which collectively account for around 20% of all jobs. Baseline economic trends⁽³⁾ suggest the majority of the employment growth would be in Salford, Manchester and Trafford.
