The vision for Greater Manchester has been desktop planned without proper engagement or public consultation from the very beginning. My local
Redacted modification - Please set out the modification(s) you consider necessary to make this section of the plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above.	There has been poor public consultation, a lack of accessible information and little spent by councils in generating awareness. Interest in the plan has mainly been generated by local protest groups. The public consultations should be repeated, providing clear, understandable information. They should be designed to encourage rather than discourage public input.

Compliance - In accordance with the Duty to Cooperate?	NA
Redacted reasons - Please give us details of why you consider the consultation point not to be legally compliant, is unsound or fails to comply with the duty to co-operate. Please be as precise as possible.	Due to the size of the greenbelt sites allocated within the plan it is highly unlikely that the infrastructure can be provided in good time to bring these sites forward within the plan period. This would make the plan undeliverable within the plan period hence making it unsound.
Redacted modification - Please set out the modification(s) you consider necessary to make this section of the plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above.	Smaller sites should be considered that would come forward faster like brownfield sites that already have substantial infrastructure provided close by.

Compliance - In accordance with the Duty to Cooperate?	NA
Redacted reasons - Please give us details of why you consider the consultation point not to be legally compliant, is unsound or fails to comply with the duty to co-operate. Please be as precise as possible.	It is very well documented that once a site is approved for development it can be reviewed at a later date with a viability assessment. Local councils have very little control after a site has been approved for houses and it is common practice for a developer to change the number of homes on the site, density, type and number that are classed as affordable. In some extreme cases a developer can state inflated development costs and no section 106 payments will come forward.
Redacted modification - Please set out the modification(s) you consider necessary to make this section of the	Local council authorities need to enter into more housing partnership projects and develop the land they own instead of selling it and losing control. Salford Council has now created it's own housing building company that will deliver affordable homes on land they own and other councils should follow suit.

make this section of the

plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above.
