Soundness - Consistent with national policy? Soundness - Effective? Compliance - Legally compliant? Compliance - Legally complianter The document "Habitat Regulations Assessment of PfE" (02.02.01) provided is draft status. The public should have the final issue report made available for the full consultation period. The environmental assessments are limited in scope and consider only the impact on Ramsar, SAC"s and SPA"s. The evidence is therefore that appropriate environmental impact assessments have not been carried out on the effects of building on green spaces on either the direct habitat lost, or the knock on effects to neighbouring habitats and impact on local communities. I note that in the case of the proposed sight at JPA 35. North of Mosley Common, this green space consistently has standing water, a possible environment for great crested newts (protected species) and that bats are known to be in the area (also protected). There is a legal obligation to assess the risks to these species, yet no evidence of consideration has been put forwards. Other proposed sites may face similar environmental issues. Redacted modification - Please set out the modification(s) you consider necessary to make this section of the plan legally compliant is make this section of the plan legally compliant. Soundness - Positively prepared?	Unsound
Soundness - Justified?	Unsound
Soundness - Consistent with national policy?	Unsound
Soundness - Effective?	Unsound
Compliance - Legally compliant?	No
Compliance - In accordance with the Duty to Cooperate?	No
Redacted reasons - Please give us details of why you consider the consultation point not to be legally compliant, is unsound or fails to comply with the duty to co-operate. Please be as precise as possible.	The policy of building on greenbelt is in direct contradiction to our national objectives of reducing our carbon emissions to protect the climate. Not only does the building development have significant carbon costs, the loss of carbon sinks should be considered.
Redacted modification - Please set out the modification(s) you consider necessary to make this section of the plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above.	The proposed development at JPA 35 North of Mosley Common (greenfield site) and other green belt spaces should be retracted

This development looks to add more residents to an area already in an unsustainable situation with regarding local amenities (doctors, schools) and transport problems, with no planned improvements for existing locals. It is already incredibly stressful living in the area from a travel perspective. The local bus route (V1&V2) does not have enough service during peak times. It faces delays into town at the end of the guided busway as traffic queues back from the junction with the A580 at Newearth Road. (This also affects those travelling by car). There is no planned improvement to this junction which I believe to already be at capacity; indeed the junction at Mosley Common Road and Walked Road (either side) are also heavily congested. The queuing traffic in the morning already has a significant affect on local air quality (I frequently need to take my inhaler when walking for the bus during rush hour). The proposal to add around 1400 more vehicles to this local section of road is just unthinkable; the knock on affect on air quality alone. Consideration should also be given to the loss of green space; this habitat is full of trees and plants which are helping to clean the local air. I note that there is no proposal included to improve local traffic flow on to motorway junctions; the mitigation is that as it gets worse, people will undergo "behaviour change". In my view we are already at the point where anyone who has the option of "behaviour change" would already do so. There is not solution proposed to ease local unsustainable transport problems. Adding to these problems is in direct opposition to the objective to "ensure all new developments are sustainably integrated into Greater Manchester"s transport network or supported by new infrastructure." The loss of local habitat by building on a greenfield site has not been properly assessed, either for its direct impact or for the knock effects on neighbouring habitats or for the impact on local residents. Consideration of local and national climate targets has not
The proposed development at JPA 35 North of Mosley Common (greenfield site) should be retracted. In line with the stated "Places for Everyone" objective, local brownfield sites should be identified for regeneration with proper, robust plans in place to provide for local amenities and improvements in local transport.
