Ensure figures used to justify any proposed build have ben 'independently verified'. Dont build on land that has an alternative viable use or may be vital to the future of food security for the nation and an area of job creation. Use Brownfield site, and regeneration of industrial areas before any Green field site - and dont use green field sites that are grade 1/ A agricultural or specialised habitats. Use areas where a substantial amount of the housing will actually be 'affordable'for the population who live there, and will not have additional ongoing costs during the build which were underestimated because of the complexity of the land being developed. Stop developing in areas which are not receiving any infrastructure upgrades to cope with the influx of new residents. Do not build where the local road susyems will not manage the additional private vehicles, and the public transport systems are poor/ already overstretched with limited capacity to increase capacity in the future - meaning the complete opposite to sustainable meeting the travel needs of

	the local population, whilst significantly increasing the pollution and reducing air quality in the local environment. Stop developing where there will be increasing road congestion as a direct result of the development.

Please be as precise as possible.	Cant argue on legality as not legally trained, but ethical, and environmental damaging for this local area. Decreases the living standards in the area and makes the area more congested and unpleasant to live in whilst removing the green space we already have access to without providing sufficient enhancement to the area

Compliance - In accordance with the Duty to Cooperate?	NA
Redacted reasons - Please give us details of why you consider the consultation point not to be legally compliant,	The main area is concentrated on a road network which is already struggling to manage the traffic in the area. The boundary of the Canal, M60, A57 and M62 provides a difficult area to travel in - and increasing the movement without a joined up policy to manage the effective movement of goods and people is difficult to justify or support.

is unsound or fails to comply with the duty to co-operate. Please be as precise as possible.	
Redacted modification - Please set out the modification(s) you consider necessary to make this section of the plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above.	An independent review into the upgrade of infrastructure, roads, bridges and rail network, and these to be implemented BEFORE any building takes place- as has happened in the past, planning is given then the infrastructure is not completed!

Please be as precise as possible.	Utilised Brown belt land currently not being utilised in an area where the infrastructure and facilities are much more able to sustain an increase in population. People living in city centres often have less need for private vehicles for work commuting as they work locally, or have access to better public transport systems.

Contravenes Global Climate Strategy as will increase pollution whilst utilising large swathes of Green belt land that can be used to support National Strategies for food production. Reduces native and specialised habitats for animal and bird species that already endangered and will not be able to utilise the new potential green parks as this does not meet their special requirements.
