Please be as precise as possible.	<p>The plans are not sustainable and not consistent with national policy. This is designated green belt and current proposals do not prove exceptional circumstances.</p> <p>The proposals would create significantly more traffic, not inline with climate change plans and pollution reduction. The existing roads and schools are not sufficient for increased traffic and children requiring schooling. The site is already waterlogged in winter but ensures water is collected, thus avoiding flood risk. Flood risk would be significantly greater with so many new impermeable surfaces on the proposed site. Nature will suffer from removal of hedgerows and fields and there would be a significant loss of much needed green space for families and recreation</p>
