Soundness - Positively prepared?	NA
Soundness - Justified?	NA
Soundness - Consistent with national policy?	Unsound
Soundness - Effective?	Unsound
Compliance - Legally compliant?	Yes
Compliance - In accordance with the Duty to Cooperate?	Yes
Redacted reasons - Please give us details of why you consider the consultation point not to be legally compliant, is unsound or fails to comply with the duty to co-operate. Please be as precise as possible.	It is impossible to see how the plan can be delivered without the full consideration of mineral resources required. The plan should be accompanied by a resource assessment and appropriate supply chain considerations. These matter were raised in our previous representations which appear to have been disregarded. The 2013 minerals plan should be reviewed in parallel.
Redacted modification - Please set out the modification(s) you consider necessary to make this section of the plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above.	The aspirations of the plan need to be fully considered. The annual monitoring of minerals extraction and changes in likely future needs must be considered in parallel to other policies in the plan. The joint minerals plan is 8 years old and in need of review.

Soundness - Justified?	NA
Soundness - Consistent with national policy?	Unsound
Soundness - Effective?	NA
Compliance - Legally compliant?	No
Compliance - In accordance with the Duty to Cooperate?	NA
Redacted reasons - Please give us details of why you consider the consultation point not to be legally compliant, is unsound or fails to comply with the duty to co-operate. Please be as precise as possible.	We cannot see how the respective councils expect to deliver the objectives outlined without the consideration of minerals and mineral product requirements. Housing school, infrastructure, renewable energy proposals, are all reliant upon a steady and adequate supply of minerals, to which no consideration appears to have been given.
Redacted modification - Please set out the modification(s) you consider necessary to make this section of the plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above.	The plan needs to consider the minerals and mineral product requirements to deliver its aspirations. However, this must also include considerations of minerals and mineral infrastructure safeguarding and supply chains. With other local authorities within the region also being markedly behind schedule on mineral plan replacement it is evident that the north west region is assuming supply, rather than planning for it.

Soundness - Consistent with national policy?	Unsound
Soundness - Effective?	Unsound
Compliance - Legally compliant?	No
Compliance - In accordance with the Duty to Cooperate?	No
Redacted reasons - Please give us details of why you consider the consultation point not to be legally compliant, is unsound or fails to comply with the duty to co-operate. Please be as precise as possible.	The plan assumes mineral supply will be forthcoming and gives no consideration to how materials will be sourced and delivered to meet the plan's aspirations of 98,000 new homes and transport proposals for the Core Growth Area. The GM Minerals Plan is in need of review and it is clear from the Local Aggregates Assessment that there are insufficient planned reserves available. Further, other local planning authorities in the region for example Lancashire and Cheshire East are in no better position with outdated policies and recognised shortfalls in meeting national planning policy requirement. The plan is unsustainable.
Redacted modification - Please set out the modification(s) you consider necessary to make this section of the plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above.	The plan needs a comprehensive resource assessment of its aspirations and consumption and should consider mineral product supply chains. Mineral resources need appropriate safeguarding, together with the safeguarding of minerals infrastructure. The plan should demonstrate how it will meet local vernacular requirements, particularly with reference to building stone character and engage with other local authorities to demonstrate achievability of the aspirations.

Places for Everyone Representation 2021

Compliance - In accordance with the Duty to Cooperate?	No
Redacted reasons - Please give us details of why you consider the consultation point not to be legally compliant, is unsound or fails to comply with the duty to co-operate. Please be as precise as possible.	The plan assumes mineral supply will be forthcoming and gives no consideration to how materials will be sourced and delivered to meet the plan's Resilience aspirations. The GM Minerals Plan is in need of review and it is clear from the Local Aggregates Assessment that there are insufficient planned reserves available. Further, other local planning authorities in the region for example Lancashire and Cheshire East are in no better position with outdated policies and recognised shortfalls in meeting national planning policy requirement. The plan is unsustainable.
Redacted modification - Please set out the modification(s) you consider necessary to make this section of the plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above.	The plan needs a comprehensive resource assessment of its aspirations and consumption and should consider mineral product supply chains. Mineral resources need appropriate safeguarding, together with the safeguarding of minerals infrastructure. The plan should demonstrate how it will meet local vernacular requirements, particularly with reference to building stone character and engage with other local authorities to demonstrate achievability of the aspirations.

Compliance - Legally compliant?	No
Compliance - In accordance with the Duty to Cooperate?	No
Redacted reasons - Please give us details of why you consider the consultation point not to be legally compliant, is unsound or fails to comply with the duty to co-operate. Please be as precise as possible.	At present there is no evidence the plan's aspirations are deliverable. The plan assumes supply and gives no consideration to the resource requirements and supply chain considerations.
Redacted modification - Please set out the modification(s) you consider necessary to make this section of the plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above.	The plan needs a commitment to minerals safeguarding and minerals infrastructure safeguarding and should be accompanied by a resource assessment and supply chain audit to ensure the aspirations can be achieved sustainably.

Title	Supporting Evidence
Type	Web
Include files	PFE1286776_MPA_RevisedDraft.pdf PFE1286776_MPA.pdf
Redacted comment on supporting documents - Please give details of why you consider any of the evidence not to be legally compliant, is unsound or fails to comply with the duty to co-operate. Please be as precise as possible.	As explained in detail, the plan assumes availability of supply or minerals and mineral products. The plan is relying upon outdated policies and has failed to give consideration to the existing and proven shortfall of consented reserves not solely in the GM area but the wider NW region. This is clearly evident in the LAAS and NAWAP annual reports. A review of the GM Minerals plan should be run in parallel and a clear and concise resource assessment and supply audit undertaken to ensure the plan's aspirations can be delivered.
