## **Social Value Policy for the GMCA**

### **1.0 Purpose**

The aim of this Policy is to set out how the Combined Authority (and its members) will deliver social value through their commissioning and procurement activities and to set the Authority's priorities in relation to social value.

### **2.0 Background and Scope**

The Public Services (Social Value) Act 2012 came into force on 31st January 2013\*. It is now a legal obligation for local authorities and other public bodies to consider the social good that could come from the procurement of services before they embark upon it. The aim of the Act is not to alter the commissioning and procurement processes, but to ensure that, as part of these processes, councils give consideration to the wider impact of the services delivery. It allows authorities, for example, to choose a supplier under a tendering process who not only provides the most economically advantageous service, but one which goes beyond the basic contract terms and secures wider benefits for the community. It could be argued that this type of approach has been adopted as good practice across Greater Manchester Authorities before the Act came into force. However, together the Act and this policy provide an opportunity to deliver a cohesive yet flexible and innovative approach to generating social value through public procurement.

Statutory requirement of the Act only apply to public service contracts above EU thresholds, however in order to incorporate the good practice associated with Social Value into mainstream commissioning and procurement practice, it is the intention of the Combined Authority to embed this policy and associated Great Manchester Social Value Framework within all commissioning and procurement activity wherever proportionate and practicable. This policy statement sets out the Combined Authority's aims in this regard. In particular it seeks to:

- Set out a definition of Social Value for Greater Manchester
- Sets out the policy context for Social Value in Greater Manchester
- Set out the priority policy objectives
- Sets out a Greater Manchester Social Value Framework

### **3.0 Defining Social Value**

The Act does not define what is meant by 'social value'. Therefore the Combined Authority will adopt the definition of social value as set out by the Sustainable Procurement Taskforce. Social Value is defined as:

A process whereby organisations meet their needs for good, services, works and utilities in a way that achieves value for money on a whole life basis in terms of generating benefits not only to the organisation, but also to society and economy, whilst minimising damage to the environment.

### **4.0 Policy Context**

The Greater Manchester Strategy 2013-20 – 'Better Together' sets the overarching strategic framework for this policy.

The strategy recognises that despite the recession, Greater Manchester's economy has been shown to be more robust than most of the rest of the UK economy. Greater

Manchester generates £48 billion GVA, a 4% share of the national economy. However, given the size of the GM economy, it is recognised that we should be achieving more. The Strategy outlines that we are currently a 'cost centre' for the UK, requiring £22 billion of public spending but only generating £17 billion in taxes. The aspiration is for Greater Manchester to close and then eliminate that £5 billion deficit to become a net contributor to the national economy.

This Public Service Reform agenda sets out a collaborative and ambitious programme with two linked aims:

- to re-design public services to build the independence and self-reliance of GM's residents; and,
- to collaboratively invest in public service interventions to help all GM partners sustainably reduce demand for their services.

These reforms are expressly designed to encourage families, individuals and communities to lead more productive and fulfilling lives. This Social Value Policy, the Greater Manchester Social Value Framework that supports it and the Social Value activities that it generates will form a key element in the delivery of Public Sector Reform.

## **5.0 Objectives**

The objectives of this policy reflect the Combined Authority's definition of Social Value (set out in Section 3.0) and are as follows:

- promote employment and economic sustainability – tackle unemployment and facilitate the development of skills
- raise the living standards of local residents – working towards living wage, maximise employee access to entitlements such as childcare and encourage suppliers to source labour from within Greater Manchester
- promote participation and citizen engagement - encourage resident participation and promote active citizenship
- build the capacity and sustainability of the voluntary and community sector – practical support for local voluntary and community groups
- promote equity and fairness – target effort towards those in the greatest need or facing the greatest disadvantage and tackle deprivation across the borough
- promote environmental sustainability – reduce wastage, limit energy consumption and procure materials from sustainable sources
